ABOUT ME

Software Developer with over 1 year of experience, specializing in designing and developing end-to-end systems across Web, Mobile, and API. Experienced in delivering systems to enterprise clients, working directly with clients, and delivering under high-pressure environments.

EXPERIENCE

KITSOMBOON BUSINESS AND TECHNOLOGY

SOFTWARE DEVELOPER | JUL 2025 – PRESENT

Key Responsibilities:

System Analysis & Design: Gather and analyze user requirements to design system architecture that meets business objectives

Full-Stack Development: Develop full-cycle applications across Web, Mobile, and API, including system testing before delivery

Database Architecture: Design and structure databases for performance and scalability

Client Coordination: Coordinate and present work directly to clients, including system delivery in production environments

AI-Assisted Development: Utilize AI as a supplementary tool for coding, code review, and bug fixing to increase work efficiency while maintaining full ownership of design and technical decisions

PROJECTS

ADMISSION TRACKING SYSTEM

Real-time patient admission tracking system for hospitals, supporting both Web and Mobile Application through a single shared API

Stack: Bun, Elysia, Next.js, Flutter, MySQL

Role: Designed and developed API, Mobile Application (Flutter), and Web Frontend

AIR QUALITY MONITOR

Air quality tracking system — analyzed and rebuilt entirely across Web, Mobile, and API with Authentication/SSO and Real-time Dashboard

Stack: Bun, Elysia, MySQL, React, Flutter

Role: Full-stack Developer — analyzed, designed, and developed the entire system from scratch, including production deployment

INTERNAL DEPLOYMENT PLATFORM (R&D)

Internal Deployment Platform for managing deployment and environment provisioning, supporting multi-role access with Deployment Tracking and Activity Logging

Stack: Bun, Elysia, Next.js, Postgresql

Role: Designed architecture and developed the entire system

EDUCATION

Bachelor of Science, Computer Science
Mahasarakham University, Thailand

TECHNICAL SKILLS

Frontend: HTML, CSS, React (JS/TS), Next.js, Flutter

Backend: Bun, Elysia, Node.js, Express

Database: MySQL, Drizzle ORM, Postgresql

Tools: GitHub, VS Code, Postman, Linux, Docker, AWS EC2

OTHER SKILLS

- Systematic problem-solving
- Teamwork and collaboration
- Adaptability and continuous learning
- Working under pressure
